2 NIGHTS /3 DAYS LODGING SAFARI in Khutse Game Reserve

HIGHLIGHTS:

- Khutse Game Reserve

Day 1, 2 & 3: Khutse Game Reserve: We depart Gaborone early morning and head for Khutse Game Reserve. Khutse is situated in a unique part of the Kalahari, which is part of an ancient River that once flowed northeastwards it fills Lake Makgadikgadi. It is the second Game Reserve in Botswana to be established on tribal land, Moremi being first. Before the establishment of the reserve the Kgalagadi (people of the Kalahari) and the San roamed the area and today there are still a large number of villages situated on the periphery of the reserve. It is also one of the closest and most accessible wilderness areas. On arrival we book into a lodge. Khutse Kalahari Lodge, gateway to the Kalahari, is a combination of modern and traditional African architecture. The main building sits at the highest point with an elevated bar and deck for panoramic views of the bush. The surrounding bush has waterholes attracting a wide variety of game and nocturnal visitors.

Waterholes in Khutse where animals drink are all artificial, and the chances of seeing lion prides in Khutse are very good; we will spend the 3 nights exploring the Park.

Day 3: Gaborone: On the 3rd Day after our morning breakfast we will check out and depart back to Gaborone.

Notes

Vegetation of Khutse consists mainly of Acacia Savannah and Kalahari sandveld communities which are dotted with Salt Pans.

Wildlife: No matter what time of the year one visits Khutse, there is always an abundance of springbok and Ostriches. Today there are artificial watering points at two of the Pans, making it possible for game to remain in the Reserve throughout the year. Eland and Giraffe are also a common sight. Khutse is a place where one can see the black maned Kalahari lion in pride of 10 - 20, the rare brown hyena and

the bat eared fox. The campsites are situated on the edge of the Pan, which makes it possible one to do game watching from the comfort of the camp chair.

Bird life: The bird life is typical of the Kalahari with the crimson-breasted Shrike, White-crowned shrike, Kalahari scrub robin, pied babbler, Black korhaan and White-browed sparrow-weaver all abundantly present. The greater kestrel, the Lesser kestrel, the Pale chanting goshawk, Lanner falcon, the Black-shouldered kite and the Black-breasted snake eagle are some of the common raptors. In summer all manner of birds can be seen on the Pans

End **of**
Safari.....
